

# Subject Index

R = IUPAC Technical Report; Asterisk (\*) = IUPAC Recommendations

- 111  
Name and symbol of the element with atomic number 111 2101\*
- ABASIC SITE STABILIZATION  
Abasic site stabilization by aromatic DNA base surrogates: High-affinity binding to a base-flipping DNA-methyltransferase 1563
- AB INITIO  
Ab initio QM/MM MD simulations of the hydrated  $\text{Ca}^{2+}$  ion 37
- AB INITIO MOLECULAR DYNAMICS  
Solid-state proton conduction: An ab initio molecular dynamics investigation of ammonium perchlorate doped with neutral ammonia 49
- AB INITIO POTENTIAL ENERGY SURFACES (PES)  
"Morphing" of ab initio-based interaction potentials to spectroscopic accuracy: Application to  $\text{Cl}^-(\text{H}_2\text{O})$  29
- ACENOCOUMAROL  
Predicting drug metabolism: Concepts and challenges 907
- ACETYLCHOLINESTERASE  
Simulations on many scales: The synapse as an example 295
- ACID SENSITIVE  
Development of acid-sensitive copolymer micelles for drug delivery 1295
- ACID-BASE EQUILIBRIA  
Controlling the physicochemical properties of weak polyelectrolyte multilayer films through acid/base equilibria 1387
- ACIDITHIOBACILLUS  
Microbially assisted dissolution of minerals and its use in the mining industry 847
- ACIDITY CONSTANTS  
Acid-base properties of purine residues and the effect of metal ions: Quantification of rare nucleobase tautomers 1869
- ACTINOMETERS  
Chemical actinometry 2105R
- ACTINOMETRY  
Chemical actinometry 2105R
- ACTIVATION ANALYSIS  
Compilation of  $k_0$  and related data for neutron-activation analysis (NAA) in the form of an electronic database 1921R
- ADEFOVIR  
Adenosine 5'-triphosphate ( $\text{ATP}^{4-}$ ): Aspects of the coordination chemistry of a multitaled biological substrate 375
- ADENOSINE 5'-TRIPHOSPHATE  
Adenosine 5'-triphosphate ( $\text{ATP}^{4-}$ ): Aspects of the coordination chemistry of a multitaled biological substrate 375
- ADSORPTION  
Controlling the physicochemical properties of weak polyelectrolyte multilayer films through acid/base equilibria 1387  
In situ poly(ethylene imine) coating of hollow fiber membranes used for microdialysis sampling 879
- AEROSOLS  
Aerosol pollution in some Chinese cities 1227R  
Aerosols: Connection between regional climate change and air quality 1241R
- AGGREGATION  
Models of liquid mixtures: Structure, dynamics, and properties 1
- AIR QUALITY  
Aerosols: Connection between regional climate change and air quality 1241R
- AIR-WATER INTERFACE  
Structure of the porphyrazine monolayer at the air-water interface: Computer simulation 197
- ALANINE-SCANNING MUTANT  
Minimalist proteins: Design of new molecular recognition scaffolds 1579
- ALCOHOLS  
Application of a compact synchrotron radiation facility to studies on the structure of solvated chloride and iodide ions in various solvents 91
- ALICYCLIC BETA AMINO ACIDS  
New endomorphin analogs with  $\mu$ -agonist and  $\delta$ -antagonist properties 951
- 2,3-ALLENOIC ACIDS  
Recent advances in transition metal-catalyzed or -mediated cyclization of 2,3-allenoic acids: New methodologies for the synthesis of butenolides 651
- ALLERGIC REACTIONS  
Mechanisms of immunosensitization to metals 1255R
- ALLYLIC ALKYLATION  
New insights into the mechanism of molybdenum-catalyzed asymmetric alkylation 625
- ALLYLIC C-H BOND ACTIVATION  
New regio-, stereo-, diastereo-, and enantioselective one-pot reactions mediated by organometallic derivatives 517
- ALLYLIC ORGANOMETALLIC COMPOUNDS  
3-Halopropenyl esters as precursors of a new class of oxygen-substituted allylic organometallic compounds: Applications in organic synthesis 657
- ALLYLMOLYBDENUM COMPLEXES  
Synthetic applications of planar chiral cationic  $\eta^3$ -allylmolybdenum complexes 477
- ALLYSTANNATION  
Mechanistic insights into perfluoroaryl borane-catalyzed allylstannations: Toward asymmetric induction with chiral boranes 615
- ALPHA DECAY  
Superheavy elements 1715
- ALPHA-HELIX  
Minimalist proteins: Design of new molecular recognition scaffolds 1579
- ALUMINUM  
Stereochemistry of epoxide carbonylation using bimetallic Lewis acid/metal carbonyl complexes 557
- AMINATION  
Palladium-catalyzed arylation of linear and cyclic polyamines 1605
- AMINOETHYLGLYCYL PEPTIDE NUCLEIC ACIDS  
Conformationally restricted cationic polyamide analogs of nucleic acids: Design, synthesis, and DNA/RNA binding studies 1599
- 2-AMINOPYRIDINES  
Application of C-H and C-C bond activation in organic synthesis 577
- AMMONIUM PERCHLORATE CRYSTALS  
Solid-state proton conduction: An ab initio molecular dynamics investigation of ammonium perchlorate doped with neutral ammonia 49
- AMPA RECEPTOR AGONISTS  
Structural basis for 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid (AMPA) receptor activation 921
- AMPA ANTAGONISTS  
Search for noncompetitive 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid receptor (AMPA) antagonists: Synthesis, pharmacological properties, and computational studies 931
- AMPEROMETRIC GLUCOSE SENSORS  
Electrochemistry and application of a novel monosubstituted squarate electron-transfer mediator in a glucose oxidase-doped poly(phenol) sensor 789
- AMPHIPHILES  
Block copolymer vesicles 1309  
From molecular modules to modular materials 1847

- AMPHIPHILIC COPOLYMERS**  
Dynamics and structure of an amphiphilic triblock copolymer of styrene and 5-(*N,N*-diethylamino) isoprene in selective solvents 123
- AMPHIPHILIC POLYSACCHARIDES**  
Polymeric micelles for oral drug delivery: Why and how 1321
- ANALYSIS**  
Critical evaluation of the state of the art of the analysis of light elements in thin films demonstrated using the examples of SiO<sub>x</sub>N<sub>y</sub> and AlO<sub>x</sub>N<sub>y</sub> films 1161R
- ANALYTICAL**  
Piezoelectric chemical sensors 1139R
- ANALYTICAL CHEMISTRY**  
Guidelines for calibration in analytical chemistry. Part 2: Multicomponent calibration 1215R
- ANAPHYLACTIC**  
Mechanisms of immunosensitization to metals 1255R
- ANDRADE EFFECT**  
In situ poly(ethylene imine) coating of hollow fiber membranes used for microdialysis sampling 879
- ANHARMONICITY**  
"Morphing" of ab initio-based interaction potentials to spectroscopic accuracy: Application to Cl<sup>-</sup>(H<sub>2</sub>O) 29
- ANISOTROPIC POTENTIALS**  
Vibration-rotation spectra of hydrogen halides in rare-gas liquids: Q-branch absorption 241
- ANTENNA SYSTEMS**  
Molecular devices 1887
- ANTIBODY-DIRECTED THERAPY**  
Passive and catalytic antibodies and drug delivery 983
- ANTICANCER AGENTS**  
Synthesis of texaphyrin conjugates 365
- ANTICONVULSANT ACTIVITY**  
Search for noncompetitive 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid receptor (AMPA) antagonists: Synthesis, pharmacological properties, and computational studies 931
- ANTIFLAVIVIRIDAE ACTIVITY**  
Hindered nucleoside analogs as antiviral agents 1007  
Virtual combinatorial chemistry and in silico screening: Efficient tools for lead structure discovery? 991
- ANTIGENS**  
From synthetic polyelectrolytes to polymer-subunit vaccines 1659
- ANTI-MARKOVNIKOV**  
Development of catalysts for the hydroamination of olefins 507
- AQUA COMPLEXES**  
Mono- and polynuclear aqua complexes and cucurbit[6]uril: Versatile building blocks for supramolecular chemistry 1633
- ARCHAEA**  
Application of allylic substitutions in natural products synthesis 495
- ARENE COMPLEXES**  
Stereoselective chromium- and molybdenum-mediated transformations of arenes 689
- AR-HCL COMPLEXES**  
Vibration-rotation spectra of hydrogen halides in rare-gas liquids: Q-branch absorption 241
- ARYLKETENES**  
Pyridylketenes: Structure reactivity effects in nucleophilic and radical addition 1953
- ASSEMBLY**  
Integrated nanoscale electronics and optoelectronics: Exploring nanoscale science and technology through semiconductor nanowires 2051
- ASYMMETRIC ACTIVATION**  
Negative nonlinear effect in aquo palladium catalysis depending on *tropos* biphenylphosphine ligand chirality controlled by chiral diaminobinaphthyl activator 537
- ASYMMETRIC 1,4-ADDITION**  
Rhodium-catalyzed asymmetric addition of aryl- and alkenylboron reagents to electron-deficient olefins 465
- ASYMMETRIC CATALYSIS**  
Application of allylic substitutions in natural products synthesis 495  
Development of a new methodology for the preparation of optically active alcohols 547  
Heterogeneous asymmetric catalysis 679  
New insights into the mechanism of molybdenum-catalyzed asymmetric alkylation 625  
Rhodium-catalyzed asymmetric addition of aryl- and alkenylboron reagents to electron-deficient olefins 465
- ASYMMETRIC SYNTHESIS**  
Asymmetric catalytic synthesis of polyketones and polycarbonates 541  
Stereoselective chromium- and molybdenum-mediated transformations of arenes 689  
Synthetic applications of planar chiral cationic  $\eta^3$ -allylmolybdenum complexes 477
- ATMOSPHERE**  
Aerosol pollution in some Chinese cities 1227R
- ATOMIC FORCE MICROSCOPY**  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115
- ATOMISTIC MONTE CARLO CALCULATIONS**  
Organic electro-optic materials 1421
- AU-BASED CATALYSTS**  
Chemical reactions at surfaces and interfaces from first principles: Theory and application 2069
- AUTOIMMUNE**  
Mechanisms of immunosensitization to metals 1255R
- AZAAROMATICS**  
S<sub>N</sub><sup>H</sup> methodology and new approaches to condensed heterocyclic systems 1621
- AZIRIDINATION OF OLEFINS**  
New methods for the synthesis of heterocyclic compounds 603
- AZOBENZENES**  
Photoinduced bending and unbending behavior of liquid-crystalline gels and elastomers 1467
- AZOBENZES AND AZOBENZE MACROMOLECULES**  
Using light to control physical properties of polymers and surfaces with azobenzene chromophores 1445
- AZOBENZENE POLYMERS**  
Light-induced motions in azobenzene-containing polymers 1479
- AZOPOLYMERS**  
New photoactive polymer and liquid-crystal materials 1499
- BASE-FLIPPING**  
Abasic site stabilization by aromatic DNA base surrogates: High-affinity binding to a base-flipping DNA-methyltransferase 1563
- BASE-MEDIATED EPOXIDES**  
Development of a new methodology for the preparation of optically active alcohols 547
- BENDING**  
Photoinduced bending and unbending behavior of liquid-crystalline gels and elastomers 1467
- 2,3-BENZODIAZEPINES**  
Search for noncompetitive 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid receptor (AMPA) antagonists: Synthesis, pharmacological properties, and computational studies 931
- BERYLLIUM**  
Diagnostic relevance of the lymphocyte transformation test for sensitization to beryllium and other metals 1269R
- BETAINE DYES**  
Pyridinium *N*-phenolate betaine dyes as empirical indicators of solvent polarity: Some new findings 1903
- BETA-ODAP**  
Glutamate oxidase advances in the selective bioanalytical detection of the neurotoxic amino acid  $\beta$ -ODAP in grass pea: A decade of progress 765
- BICONJUGATES**  
Selection and characterization of DNazymes with synthetically appended functionalities: A case of a synthetic RNaseA mimic 1571
- BIGINELLI REACTION**  
Solid- and solution-phase synthesis of bioactive dihydropyrimidines 1017
- BINAP**  
Negative nonlinear effect in aquo palladium catalysis depending on *tropos* biphenylphosphine ligand chirality controlled by chiral diaminobinaphthyl activator 537

- BINDING MECHANISMS**  
Use of phytofiltration technologies in the removal of heavy metals: A review 801
- BIOACTIVE**  
Domino reactions in the synthesis of heterocyclic natural products and analogs 1967
- BIOANALYTICAL CHEMISTRY**  
Postgenomic chemistry: New problems and challenges 1781
- BIOANALYTICAL DETECTION**  
Glutamate oxidase advances in the selective bioanalytical detection of the neurotoxic amino acid  $\beta$ -ODAP in grass pea: A decade of progress 765
- BIOCATALYSIS**  
Recent advances in catalyst immobilization using supercritical carbon dioxide 635
- BIOCIDES**  
Biosensors for environmental applications: Future development trends 723
- BIOFOULING**  
Protein adsorption to planar electrochemical sensors and sensor materials 753
- BIOINFORMATICS**  
Postgenomic chemistry: New problems and challenges 1781
- BIOISOSTERISM**  
Structural basis for 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid (AMPA) receptor activation 921
- BIOLEACHING**  
Microbially assisted dissolution of minerals and its use in the mining industry 847
- BIOLOGICAL REAGENTS**  
Trends and challenges in biochemical sensors for clinical and environmental monitoring 861
- BIOMARKERS**  
Mechanisms of immunosensitization to metals 1255R
- BIOMATERIALS**  
Dendritic polymers composed of glycerol and succinic acid: Synthetic methodologies and medical applications 1375
- BIOMIMETIC CHEMISTRY**  
Understanding the reaction that powers this world: Biomimetic studies of respiratory  $O_2$  303  
Understanding the reaction that powers this world: Biomimetic studies of respiratory  $O_2$  reduction by cytochrome oxidase. Erratum 1293
- BIOMINING**  
Microbially assisted dissolution of minerals and its use in the mining industry 847
- BIOORGANIC**  
Fifty years of "Watson–Crick" 1521
- BIO-OXIDATION**  
Microbially assisted dissolution of minerals and its use in the mining industry 847
- BIOPOLYMERS**  
Immobilized peptides/amino acids on solid supports for metal remediation 777
- BIOSENSORS**  
Biosensors for environmental applications: Future development trends 723  
Engineering DNA aptamers and DNA enzymes with fluorescence-signaling properties 1547  
Trends and challenges in biochemical sensors for clinical and environmental monitoring 861
- BIOSORPTION**  
Use of phytofiltration technologies in the removal of heavy metals: A review 801
- BIOTRANSFORMATION**  
Predicting drug metabolism: Concepts and challenges 907
- BIPHALIN**  
Neuropeptide mimetics for pain management 941
- BLOCK COPOLYMERS**  
Block copolymer vesicles 1309  
Directing self-assembly in macromolecular systems: Hydrogen bonding in ordered polymers 1337
- BUTENOLIDES**  
Recent advances in transition metal-catalyzed or -mediated cyclization of 2,3-allenoic acids: New methodologies for the synthesis of butenolides 651
- BZIP**  
Minimalist proteins: Design of new molecular recognition scaffolds 1579
- (–)-CABENEGRIN A-I**  
Synthesis of naturally occurring o-heterocyclic compounds of biological activity 1025
- CALCIUM**  
Ab initio QM/MM MD simulations of the hydrated  $Ca^{2+}$  ion 37
- CALIBRATION**  
Guidelines for calibration in analytical chemistry. Part 2: Multicomponent calibration 1215R
- CAPILLARY ELECTROMIGRATION**  
Terminology for analytical capillary electromigration techniques 443\*
- CAPILLARY ELECTROPHORESIS**  
Terminology for analytical capillary electromigration techniques 443\*
- CARBAMATE**  
Morphology of blends of self-assembling long-chain carbamate and stearic acid 1353
- CARBENES**  
Metal cyclopropyl carbenes in the reactions of alkynes with alkenes and furans 453
- CARBON DIOXIDE**  
Stoichiometric and catalytic  $CO_2$  reductions involving TFe-containing intermetallic hydrides 1769
- CARBON DISULFIDE**  
Calculation of the free energy of solvation from molecular dynamics simulations 231
- CARBON ELECTRODES**  
Selective control and rate enhancement of reactions involving catalytic reduction of organohalides and reduced form of myoglobin in microemulsions 815
- CARBON MONOXIDE**  
Stereochemistry of epoxide carbonylation using bimetallic Lewis acid/metal carbonyl complexes 557
- CARBON NUCLEOPHILES**  
Palladium-catalyzed alkylation of unactivated olefins 671
- CARBONYL COMPLEXES**  
Stereoselective chromium- and molybdenum-mediated transformations of arenes 689
- CARDIOVASCULAR AGENTS**  
NO donors: Focus on furoxan derivatives 973
- CASCADE REARRANGEMENTS**  
Monocyclic and cascade rearrangements of furoxans 1691
- CATALYSIS**  
Coordination of the Trost modular ligand to palladium allyl fragments: Oligomers, monomers, and memory effects in catalysis 589  
Fifty years of "Watson–Crick" 1521  
Modeling prebiotic catalysis with nucleic acid-like polymers and its implications for the proposed RNA world 2085  
Palladium-catalyzed alkylation of unactivated olefins 671
- CATALYSTS**  
Stereochemistry of epoxide carbonylation using bimetallic Lewis acid/metal carbonyl complexes 557  
Substrate scope in the olefin cyclopropanation reaction catalyzed by  $\mu$ -oxo-bis(salen)iron(III) complexes 645
- CATALYTIC ANTIBODIES**  
Passive and catalytic antibodies and drug delivery 983
- C–C BOND ACTIVATION**  
Application of C–H and C–C bond activation in organic synthesis 577
- CELL ANALYSIS**  
Proteomics principles and challenges 829
- C-GLYCOSIDES**  
Abasic site stabilization by aromatic DNA base surrogates: High-affinity binding to a base-flipping DNA-methyltransferase 1563
- CHARGE TRANSPORT**  
Morphological reasoning for the enhanced charge carrier mobility of a hole transport molecule in polystyrene 1509
- CHELATION ASSISTANCE**  
Application of C–H and C–C bond activation in organic synthesis 577

- CHEMICAL PROTEOMICS**  
Postgenomic chemistry: New problems and challenges 1781
- CHEMICAL SENSORS**  
Piezoelectric chemical sensors 1139R
- CHEMICAL SHIFTS**  
External double reference method to study concentration and temperature dependences of chemical shifts determined on a unified scale 105
- CHEMICAL SPECIATION ANALYSIS**  
Determination of trace elements bound to soil and sediment fractions 415R
- CHEMICAL SYNTHESIS**  
Integrated nanoscale electronics and optoelectronics: Exploring nanoscale science and technology through semiconductor nanowires 2051
- CHEMILUMINESCENT BIOSENSORS**  
Glutamate oxidase advances in the selective bioanalytical detection of the neurotoxic amino acid  $\beta$ -ODAP in grass pea: A decade of progress 765
- CHEMOSELECTIVE MOLECULES**  
New methods for the synthesis of heterocyclic compounds 603
- CHEMOTHERAPEUTIC AGENTS**  
Synthesis of texaphyrin conjugates 365
- CHEMOTHERAPY**  
Prion protein as a target for therapeutic interventions 915
- CHINA**  
Aerosol pollution in some Chinese cities 1227R
- CHIRAL METAL COMPLEXES**  
Asymmetric catalytic synthesis of polyketones and polycarbonates 541
- CHIRAL QUATERNARY CENTERS**  
New regio-, stereo-, diastereo-, and enantioselective one-pot reactions mediated by organometallic derivatives 517
- CHIROTIC TECHNOLOGY**  
Heterogeneous asymmetric catalysis 679
- CHLORIDE AND IODIDE IONS**  
Application of a compact synchrotron radiation facility to studies on the structure of solvated chloride and iodide ions in various solvents 91
- CHOLESTEROL**  
Derivation of a molecular mechanics force field for cholesterol 189
- CHROMATOGRAPHY**  
Characterization of polyamides 6, 11, and 12: Determination of molecular weight by size exclusion chromatography 2009R  
Guidelines for calibration in analytical chemistry. Part 2: Multicomponent calibration 1215R
- CHROMIUM**  
Stereoselective chromium- and molybdenum-mediated transformations of arenes 689
- CHRONOCOULOMETRIC SYNTHESIS**  
Electrochemistry and application of a novel monosubstituted squarate electron-transfer mediator in a glucose oxidase-doped poly(phenol) sensor 789
- CLIMATE**  
Aerosols: Connection between regional climate change and air quality 1241R
- CLINICAL LABORATORY**  
Properties and units in the clinical laboratory sciences. Part XVIII. Properties and units in clinical molecular biology 1799R
- CLUSTER COMPOUNDS**  
Mono- and polynuclear aqua complexes and cucurbit[6]uril: Versatile building blocks for supramolecular chemistry 1633
- COOXIDATION**  
Chemical reactions at surfaces and interfaces from first principles: Theory and application 2069
- COATED WIRE**  
Potentiometric detection for high-performance liquid chromatography is a reality: Which classes of organic substances are the targets? 839
- COBALT**  
Stereochemistry of epoxide carbonylation using bimetallic Lewis acid/metal carbonyl complexes 557
- COFACTORS**  
Cooperation of metals with electroactive ligands of biochemical relevance: Beyond metalloporphyrins 351  
Ribozymes that use redox cofactors 1525
- COLLOIDS**  
Controlling the physicochemical properties of weak polyelectrolyte multilayer films through acid/base equilibria 1387
- COLOSSAL MAGNETORESISTIVITY**  
Fundamental chemical features of complex manganites and cuprates for advanced functional materials engineering 1749
- COMBINATORIAL CHEMISTRY**  
Solid- and solution-phase synthesis of bioactive dihydropyrimidines 1017
- COMBINATORIAL SELECTION**  
Selection and characterization of DNazymes with synthetically appended functionalities: A case of a synthetic RNaseA mimic 1571
- COMFA**  
QSAR and related procedures for prescreening and predicting potential endocrine-active compounds: Workshop 1.6 1927
- COMMISSION AND DIVISION REPORTS (R = IUPAC TECHNICAL REPORT AND \* = IUPAC RECOMMENDATIONS)**  
Analytical Chemistry Division, 415–442R, 443–451R, 1119–1138R, 1139–1160R, 1161–1213R, 1215–1225R, 1921–1925R  
Chemistry and Human Health Division, 1033–1082\*, 1255–1268R, 1269–1281R, 1799–1807R  
Chemistry and the Environment Division, 1227–1239R, 1241–1253R  
Commission on Macromolecular Nomenclature, 889–906R, 1985–2007\*, 2027–2049R  
Inorganic Chemistry Division, 2101–2103\*  
Macromolecular Division, 389–413R, 889–906R, 1985–2007\*, 2009–2025R  
Physical and Biophysical Chemistry Division, 1083–1118\*, 2147–2180R  
Organic and Biomolecular Chemistry Division, 2105–2146R
- COMPACT SR STRUCTURE**  
Application of a compact synchrotron radiation facility to studies on the structure of solvated chloride and iodide ions in various solvents 91
- COMPLEXATION AND SELF-ASSEMBLY**  
Using light to control physical properties of polymers and surfaces with azobenzene chromophores 1445
- COMPOSITES**  
Definition of terms related to polymer blends, composites, and multiphase polymeric materials 1985\*
- COMPUTER SIMULATION**  
Simulations on many scales: The synapse as an example 295  
Structure of the porphyrazine monolayer at the air–water interface: Computer simulation 197
- COMPUTERIZED DESIGN**  
Physicochemical and technological features of creating metal-based high-superalloys 1679
- CONDUCTANCE**  
Structure and criticality of ionic fluids 19
- CONFERENCES/SYMPOSIA**  
Analytical Chemists, Southern and Eastern Africa Network of (SEANAC), Gaborone, Botswana, 7–10 July 2003: 697–888  
Bioinorganic Chemistry, 2<sup>nd</sup> Santa María Workshop on Chemistry Devoted to, Santa María del Mar, Havana, Cuba, 7–11 July 2003: 321–388  
General and Applied Chemistry, XVII Mendeleev Congress on, Kazan, Tatarstan, Russia, 21–26 September 2003: 1605–1798  
Heterocyclic Chemistry, 5<sup>th</sup> Florida Conference on, Gainesville, Florida, USA, 7–10 March 2004: 1933–1983  
39<sup>th</sup> IUPAC Congress and 86<sup>th</sup> Conference of the Canadian Society for Chemistry: Chemistry at the Interfaces, Ottawa, Canada, 10–15 August 2003: 1295–1603  
Medicinal Chemistry, Polish–Austrian–German–Hungarian–Italian Joint Meeting on, Kraków, Poland, 15–18 October 2003: 907–1032  
Organometallic Chemistry Directed Towards Organic Synthesis (OMCOS-12), 12<sup>th</sup> IUPAC International Symposium on, Toronto, Ontario, Canada, 6–10 July 2003: 453–695  
Physical Chemistry of Liquids, European Molecular Liquids Group (EMLG) Annual Meeting on the, Rhodes, Greece, 7–15 September 2002: 1–261

- Solution Chemistry, 28<sup>th</sup> International Conference on, Debrecen, Hungary, 23–28 August 2003: 1809–1919
- CONFORMATION  
Morphological reasoning for the enhanced charge carrier mobility of a hole transport molecule in polystyrene 1509
- CONFORMATION ANALYSIS  
Spacer conformation in biologically active molecules 959
- CONJUGATES  
From synthetic polyelectrolytes to polymer-subunit vaccines 1659  
Synthesis of texaphyrin conjugates 365
- CONTROLLED RELEASE  
Composite tectocapsules via the self-assembly of functionalized poly(divinylbenzene) microspheres 1365
- CONVERGENT SYNTHESIS  
Dendritic polymers composed of glycerol and succinic acid: Synthetic methodologies and medical applications 1375
- COORDINATION  
Coordination of the Trost modular ligand to palladium allyl fragments: Oligomers, monomers, and memory effects in catalysis 589
- COORDINATION CHEMISTRY  
Recent developments in the coordination chemistry of stable free radicals 277
- COPOLYMERS  
Development of acid-sensitive copolymer micelles for drug delivery 1295
- COPOLYMERIZATION OF ALPHA-OLEFINS  
Asymmetric catalytic synthesis of polyketones and polycarbonates 541
- COPPER  
Application of allylic substitutions in natural products synthesis 495  
Cooperation of metals with electroactive ligands of biochemical relevance: Beyond metalloporphyrins 351
- COPPER AND MANGANESE OXIDES  
Fundamental chemical features of complex manganites and cuprates for advanced functional materials engineering 1749
- COPPER CATALYSIS  
Development of a new methodology for the preparation of optically active alcohols 547
- COPPER(II)  
Copper(II) proteins are amenable for NMR investigations 321
- CORRESPONDING STATE  
Structure and criticality of ionic fluids 19
- COULOMB FLUIDS  
Structure and criticality of ionic fluids 19
- COX–MERZ RULE  
Rheological properties and associated structural characteristics of some aromatic polycondensates including liquid-crystalline polyesters and cellulose derivatives 2027R
- CRITICAL PHENOMENA  
Critical Raman line shape behavior of fluid nitrogen 147
- CRYSTALS  
Morphological reasoning for the enhanced charge carrier mobility of a hole transport molecule in polystyrene 1509
- CRYSTAL STRUCTURES  
Mono- and polynuclear aqua complexes and cucurbit[6]uril: Versatile building blocks for supramolecular chemistry 1633
- CTTS  
Building a molecular-level picture of the ultrafast dynamics of the charge-transfer-to-solvent (CTTS) reaction of sodide (Na<sup>-</sup>) 1809
- CUCURBITURIL  
Mono- and polynuclear aqua complexes and cucurbit[6]uril: Versatile building blocks for supramolecular chemistry 1633
- CYCLIC OXYMETALLATION-REDUCTIVE ELIMINATION  
Recent advances in transition metal-catalyzed or -mediated cyclization of 2,3-allenoic acids: New methodologies for the synthesis of butenolides 651
- CYCLIZATION  
Metal cyclopropyl carbenes in the reactions of alkynes with alkenes and furans 453
- CYCLODEXTRINS  
Past, present, and future of cyclodextrin research 1825
- CYCLOHEXANE DESIGN  
New methods for the synthesis of heterocyclic compounds 603
- CYCLOSPORIN A  
Polymeric micelles for oral drug delivery: Why and how 1321
- CYTOCHROME OXIDASE  
Understanding the reaction that powers this world: Biomimetic studies of respiratory O<sub>2</sub> 303  
Understanding the reaction that powers this world: Biomimetic studies of respiratory O<sub>2</sub> reduction by cytochrome oxidase. Erratum 1293
- DABN  
Negative nonlinear effect in aquo palladium catalysis depending on *trans*-biphenylphosphine ligand chirality controlled by chiral diaminobinaphthyl activator 537
- DATABASE  
Compilation of  $k_0$  and related data for neutron-activation analysis (NAA) in the form of an electronic database 1921R
- DEAROMATIZATION  
Stereoselective chromium- and molybdenum-mediated transformations of arenes 689
- DECAY ENERGIES  
Superheavy elements 1715
- DEFINITIONS  
Definition of terms related to polymer blends, composites, and multiphase polymeric materials 1985\*  
Glossary of terms used in toxicokinetics 1033\*
- DEFORMATION  
Photoinduced bending and unbending behavior of liquid-crystalline gels and elastomers 1467
- DEGRADABLE  
Development of acid-sensitive copolymer micelles for drug delivery 1295
- DENDRIMERS  
Dendritic polymers composed of glycerol and succinic acid: Synthetic methodologies and medical applications 1375  
Dendritic polyphenylazomethines: Synthesis, structure, and metal-assembling function 1399  
Molecular devices 1887  
Organic electro-optic materials 1421
- DENDRONIZED POLYMERS  
Organic electro-optic materials 1421
- DENSITY DEPENDENCE  
Critical Raman line shape behavior of fluid nitrogen 147
- DENSITY FLUCTUATIONS  
Critical Raman line shape behavior of fluid nitrogen 147
- DENSITY FUNCTIONAL THEORY  
Chemical reactions at surfaces and interfaces from first principles: Theory and application 2069
- DEOXYRIBOZYME  
Structure–function investigation of a deoxyribozyme with dual chelatase and peroxidase activities 1537
- DESIGN  
Hindered nucleoside analogs as antitumor agents 1007  
Virtual combinatorial chemistry and in silico screening: Efficient tools for lead structure discovery? 991
- DETECTORS  
Electrochemical detection in liquid flow analytical techniques: Characterization and classification 1119R
- DEXTRAN  
Polymeric micelles for oral drug delivery: Why and how 1321
- DIALYSIS  
Why liquid membrane extraction is an attractive alternative in sample preparation 707
- DIAZO COMPOUNDS  
Substrate scope in the olefin cyclopropanation reaction catalyzed by  $\mu$ -oxo-bis(salen)iron(III) complexes 645
- DIAZOESTERS  
Substrate scope in the olefin cyclopropanation reaction catalyzed by  $\mu$ -oxo-bis(salen)iron(III) complexes 645
- DIELECTRIC CONSTANT  
Thermodynamical, structural, and dielectric properties of molecular liquids from integral equation theories and from simulations 63
- DIELS–ALDER CASCADE  
Tandem methodology for heterocyclic synthesis 1933

- DIELS–ALDER REACTION**  
Negative nonlinear effect in aquo palladium catalysis depending on *tropos* biphenylphosphine ligand chirality controlled by chiral diaminobinaphthyl activator 537
- DIENYL METALS**  
New regio-, stereo-, diastereo-, and enantioselective one-pot reactions mediated by organometallic derivatives 517
- DIFFUSION COEFFICIENTS**  
Translational and rotational dynamics in supercritical methanol from molecular dynamics simulation 203
- DIHYDROPYRIMIDINES**  
Solid- and solution-phase synthesis of bioactive dihydropyrimidines 1017
- DIMETHYL ETHER**  
Ecologically benign motor fuels and petrochemicals from alternative raw materials 1735
- DINUCLEAR RUTHENIUM COMPLEXES**  
Near-infrared absorbing organic materials 1435
- DIPHENYLAMINOSQUARATE ELECTROCHEMISTRY**  
Electrochemistry and application of a novel monosubstituted squarate electron-transfer mediator in a glucose oxidase-doped poly(phenol) sensor 789
- DIPOLAR LIQUIDS**  
Raman noncoincidence effect: A spectroscopic manifestation of the intermolecular vibrational coupling in dipolar molecular liquids 157
- DIVERGENT SYNTHESIS**  
Dendritic polymers composed of glycerol and succinic acid: Synthetic methodologies and medical applications 1375
- DMSO**  
Calculation of the free energy of solvation from molecular dynamics simulations 231
- DNA**  
Fifty years of “Watson–Crick” 1521
- DNA APTAMERS**  
Engineering DNA aptamers and DNA enzymes with fluorescence-signaling properties 1547
- DNA ENZYMES**  
Engineering DNA aptamers and DNA enzymes with fluorescence-signaling properties 1547
- DNA METHYLTRANSFERASES**  
Abasic site stabilization by aromatic DNA base surrogates: High-affinity binding to a base-flipping DNA-methyltransferase 1563
- DNA/RNA MIMICS**  
Conformationally restricted cationic polyamide analogs of nucleic acids: Design, synthesis, and DNA/RNA binding studies 1599
- DNA-PROTEIN INTERACTION**  
Abasic site stabilization by aromatic DNA base surrogates: High-affinity binding to a base-flipping DNA-methyltransferase 1563
- DNAZYMES**  
Selection and characterization of DNazymes with synthetically appended functionalities: A case of a synthetic RNaseA mimic 1571
- DOCKING**  
Structural basis for 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid (AMPA) receptor activation 921
- DOMINO CASCADE**  
Tandem methodology for heterocyclic synthesis 1933
- DOMINO REACTIONS**  
Domino reactions in the synthesis of heterocyclic natural products and analogs 1967
- DOUBLATOMIC LAYER**  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115
- DRUG DELIVERY**  
Development of acid-sensitive copolymer micelles for drug delivery 1295  
Polymeric micelles for oral drug delivery: Why and how 1321
- DRUG FORMULATION**  
Past, present, and future of cyclodextrin research 1825
- DRUG METABOLISM**  
Predicting drug metabolism: Concepts and challenges 907
- DRUG THERAPY**  
Passive and catalytic antibodies and drug delivery 983
- DYNAMIC PROCESSES**  
Models of liquid mixtures: Structure, dynamics, and properties 1
- DYNAMIC PROPERTIES**  
Translational and rotational dynamics in supercritical methanol from molecular dynamics simulation 203
- DYNAMICS**  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115  
Spectroscopy of interparticle interactions in ionic and molecular liquids: Novel approaches 171  
Supercritical water: Local order and molecular dynamics 133
- ELECTROSMOSIS**  
Terminology for analytical capillary electromigration techniques 443\*
- ELECTRIC TRANSDUCERS**  
Piezoelectric chemical sensors 1139R
- ELECTROCHEMICAL**  
Electrochemical detection in liquid flow analytical techniques: Characterization and classification 1119R
- ELECTROCHEMICAL SENSORS**  
Piezoelectric chemical sensors 1139R  
Protein adsorption to planar electrochemical sensors and sensor materials 753
- ELECTROCHEMISTRY**  
Electrochemistry at the interface between two immiscible electrolyte solutions 2147R  
Understanding the reaction that powers this world: Biomimetic studies of respiratory O<sub>2</sub> 303
- ELECTROCHROMATOGRAPHY**  
Terminology for analytical capillary electromigration techniques 443\*
- ELECTROCHROMIC**  
Near-infrared absorbing organic materials 1435
- ELECTRODIALYSIS**  
Why liquid membrane extraction is an attractive alternative in sample preparation 707
- ELECTROFREEZING**  
Origin of the enhanced structural and reorientational relaxation rates in the presence of relatively weak dc electric fields 215
- ELECTROKINETIC CHROMATOGRAPHY**  
Terminology for analytical capillary electromigration techniques 443\*
- ELECTRON BEAM ANALYTICAL TECHNIQUES**  
Critical evaluation of the state of the art of the analysis of light elements in thin films demonstrated using the examples of SiO<sub>x</sub>N<sub>y</sub> and AlO<sub>x</sub>N<sub>y</sub> films 1161R
- ELECTRON MICROSCOPY**  
Dynamics and structure of an amphiphilic triblock copolymer of styrene and 5-(*N,N*-diethylamino) isoprene in selective solvents 123
- ELECTRON RELAXATION**  
Copper(II) proteins are amenable for NMR investigations 321
- ELECTRON TRANSFER**  
Cooperation of metals with electroactive ligands of biochemical relevance: Beyond metalloporphyrins 351
- ELECTRON TRANSFER**  
Building a molecular-level picture of the ultrafast dynamics of the charge-transfer-to-solvent (CTTS) reaction of sodide (Na<sup>-</sup>) 1809
- ELECTROSYNTHETIC POLY(PHENOL) NANOFILMS**  
Electrochemistry and application of a novel monosubstituted squarate electron-transfer mediator in a glucose oxidase-doped poly(phenol) sensor 789
- ELEMENT**  
Name and symbol of the element with atomic number 111 2101\*
- ELLIPSOMETRY**  
Critical evaluation of the state of the art of the analysis of light elements in thin films demonstrated using the examples of SiO<sub>x</sub>N<sub>y</sub> and AlO<sub>x</sub>N<sub>y</sub> films 1161R
- EMISSIONS**  
Aerosol pollution in some Chinese cities 1227R
- ENANTIOSELECTIVE CATALYSIS**  
Heterogeneous asymmetric catalysis 679  
Recent advances in catalyst immobilization using supercritical carbon dioxide 635

- ENANTIOSELECTIVE SYNTHESIS**  
Synthesis of naturally occurring  $\alpha$ -heterocyclic compounds of biological activity 1025
- ENDOCRINE**  
QSAR and related procedures for prescreening and predicting potential endocrine-active compounds: Workshop 1.6 1927
- ENDOMORPHINS**  
New endomorphin analogs with  $\mu$ -agonist and  $\delta$ -antagonist properties 951
- ENKEPHALIN**  
Neuropeptide mimetics for pain management 941
- ENVIRONMENTAL CONTAMINANTS**  
Biosensors for environmental applications: Future development trends 723
- ENVIRONMENTAL INDICATORS**  
Trends and challenges in biochemical sensors for clinical and environmental monitoring 861
- ENVIRONMENTAL MONITORING**  
Trends and challenges in biochemical sensors for clinical and environmental monitoring 861
- ENYNES**  
Metal cyclopropyl carbenes in the reactions of alkynes with alkenes and furans 453
- ENZYMATIC INTERFERENCE ELIMINATION**  
Glutamate oxidase advances in the selective bioanalytical detection of the neurotoxic amino acid  $\beta$ -ODAP in grass pea: A decade of progress 765
- ENZYMATIC REACTIONS**  
Predicting drug metabolism: Concepts and challenges 907
- ENZYME MIMIC**  
Selection and characterization of DNazymes with synthetically appended functionalities: A case of a synthetic RNaseA mimic 1571
- EPOXIDE**  
Stereochemistry of epoxide carbonylation using bimetallic Lewis acid/metal carbonyl complexes 557
- EQUATION OF STATE**  
Structure and criticality of ionic fluids 19
- ERRATA**  
Revised Section F: Natural products and related compounds (IUPAC Recommendations 1999). Corrections and modifications (2004) 1283  
Understanding the reaction that powers this world: Biomimetic studies of respiratory  $O_2$  reduction by cytochrome oxidase. Erratum 1293
- ET(30) VALUES**  
Pyridinium *N*-phenolate betaine dyes as empirical indicators of solvent polarity: Some new findings 1903
- ETHYLENE OXIDE**  
Protein adsorption to planar electrochemical sensors and sensor materials 753
- EXAFS**  
Application of a compact synchrotron radiation facility to studies on the structure of solvated chloride and iodide ions in various solvents 91
- EXCITATORY AMINO ACID**  
Structural basis for 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid (AMPA) receptor activation 921
- EXPERT SYSTEMS**  
Predicting drug metabolism: Concepts and challenges 907
- EXTERNAL DOUBLE REFERENCE METHOD**  
External double reference method to study concentration and temperature dependences of chemical shifts determined on a unified scale 105
- FENOFIBRIC ACID**  
Photodegradation and photosensitization in pharmaceutical products: Assessing drug phototoxicity 263
- FINITE ELEMENTS**  
Simulations on many scales: The synapse as an example 295
- FLUCTUATIONS**  
Models of liquid mixtures: Structure, dynamics, and properties 1
- FLUID NITROGEN**  
Critical Raman line shape behavior of fluid nitrogen 147
- FLUORESCENCE**  
Abasic site stabilization by aromatic DNA base surrogates: High-affinity binding to a base-flipping DNA-methyltransferase 1563  
Engineering DNA aptamers and DNA enzymes with fluorescence-signaling properties 1547
- FORCE FIELD**  
Derivation of a molecular mechanics force field for cholesterol 189
- FREE ENERGY OF SOLVATION**  
Calculation of the free energy of solvation from molecular dynamics simulations 231
- FREQUENCY MATCHING**  
Derivation of a molecular mechanics force field for cholesterol 189
- FT-SYNTHESIS**  
Ecologically benign motor fuels and petrochemicals from alternative raw materials 1735
- FUNCTIONAL POLYMERS**  
Definitions of terms relating to reactions of polymers and to functional polymeric materials 889\*
- FURANOURACIL**  
Chemistry for the synthesis of nucleobase-modified peptide nucleic acid 1591
- FURANS**  
Metal cyclopropyl carbenes in the reactions of alkynes with alkenes and furans 453
- FUROXANS**  
NO donors: Focus on furoxan derivatives 973
- FUSION PROTEINS**  
Postgenomic chemistry: New problems and challenges 1781
- GALVANOSTATIC**  
Electrochemical detection in liquid flow analytical techniques: Characterization and classification 1119R
- GANGLIOSIDE**  
New schemes for the synthesis of glycolipid oligosaccharide chains 1705
- GASOLINE**  
Ecologically benign motor fuels and petrochemicals from alternative raw materials 1735
- GCN4**  
Minimalist proteins: Design of new molecular recognition scaffolds 1579
- 2D-GELS**  
Proteomics principles and challenges 829
- GENES**  
Fifty years of "Watson-Crick" 1521
- GENETIC CODE**  
Fifty years of "Watson-Crick" 1521
- GENOME**  
Fifty years of "Watson-Crick" 1521
- GEPOL**  
Calculation of the free energy of solvation from molecular dynamics simulations 231
- GINZBURG TEMPERATURE**  
Structure and criticality of ionic fluids 19
- GLASS TRANSITION**  
Morphological reasoning for the enhanced charge carrier mobility of a hole transport molecule in polystyrene 1509
- GLOBOSIDE**  
New schemes for the synthesis of glycolipid oligosaccharide chains 1705
- GLOSSARY**  
Chemical actinometry 2105R
- GLUCOSE OXIDASE BIOELECTRODE**  
Electrochemistry and application of a novel monosubstituted squarate electron-transfer mediator in a glucose oxidase-doped poly(phenol) sensor 789
- GLUTAMATE**  
Structural basis for 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid (AMPA) receptor activation 921
- GLUTAMATE OXIDASE REACTOR**  
Glutamate oxidase advances in the selective bioanalytical detection of the neurotoxic amino acid  $\beta$ -ODAP in grass pea: A decade of progress 765
- GLYCEROL**  
Inelastic X-ray scattering and high-frequency dynamics of molecular liquids 79

- GLYCOLIPID**  
New schemes for the synthesis of glycolipid oligosaccharide chains 1705
- GLYCOSYLATION**  
New schemes for the synthesis of glycolipid oligosaccharide chains 1705
- GOLD**  
Metal cyclopropyl carbenes in the reactions of alkynes with alkenes and furans 453
- GRASS PEA**  
Glutamate oxidase advances in the selective bioanalytical detection of the neurotoxic amino acid  $\beta$ -ODAP in grass pea: A decade of progress 765
- GREEN CHEMISTRY**  
Molecular structure, reorientational dynamics, and intermolecular interactions in the neat ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate 255
- GRIPPOL**  
From synthetic polyelectrolytes to polymer-subunit vaccines 1659
- GROTHUUS MECHANISM**  
Solid-state proton conduction: An ab initio molecular dynamics investigation of ammonium perchlorate doped with neutral ammonia 49
- GUANINE-QUADRUPLEX**  
Structure–function investigation of a deoxyribozyme with dual chelatase and peroxidase activities 1537
- GUIDELINES**  
Guidelines for calibration in analytical chemistry. Part 2: Multicomponent calibration 1215R
- 3-HALOPROPENYL ESTERS**  
3-Halopropenyl esters as precursors of a new class of oxygen-substituted allylic organometallic compounds: Applications in organic synthesis 657
- HANSCH**  
QSAR and related procedures for prescreening and predicting potential endocrine-active compounds: Workshop 1.6 1927
- HEAVY ION REACTIONS**  
Superheavy elements 1715
- HEAVY METALS**  
Use of phytofiltration technologies in the removal of heavy metals: A review 801
- HECK REACTION**  
Dual role of nucleophiles in palladium-catalyzed Heck, Stille, and Sonogashira reactions 565
- HECK-OXYARYLATION**  
Synthesis of naturally occurring  $\alpha$ -heterocyclic compounds of biological activity 1025
- HEME**  
Understanding the reaction that powers this world: Biomimetic studies of respiratory  $O_2$  303  
Understanding the reaction that powers this world: Biomimetic studies of respiratory  $O_2$  reduction by cytochrome oxidase. Erratum 1293
- HEME MODELS**  
Probing fundamental mechanisms of nitric oxide reactions with metal centers 335
- HEME PROTEINS**  
Probing fundamental mechanisms of nitric oxide reactions with metal centers 335
- HETEROCYCLES**  
Solid- and solution-phase synthesis of bioactive dihydropyrimidines 1017
- HETEROCYCLIC**  
Domino reactions in the synthesis of heterocyclic natural products and analogs 1967  
Tandem methodology for heterocyclic synthesis 1933
- HETEROGENEOUS CATALYSIS**  
Recent advances in catalyst immobilization using supercritical carbon dioxide 635  
Stoichiometric and catalytic  $CO_2$  reductions involving TiFe-containing intermetallic hydrides 1769
- HETEROSUBSTITUTED STEREOCENTERS**  
3-Halopropenyl esters as precursors of a new class of oxygen-substituted allylic organometallic compounds: Applications in organic synthesis 657
- HEXAFLUOROBENZENE**  
Local density inhomogeneities detected by Raman scattering in supercritical hexafluorobenzene 141
- H–H BOND ACTIVATION**  
Application of C–H and C–C bond activation in organic synthesis 577
- HIGH-TEMPERATURE SUPERCONDUCTORS**  
Fundamental chemical features of complex manganites and cuprates for advanced functional materials engineering 1749
- HINDERED ROTATION**  
Vibration-rotation spectra of hydrogen halides in rare-gas liquids: Q-branch absorption 241
- HISTORY OF CYCLODEXTRINS**  
Past, present, and future of cyclodextrin research 1825
- HNA**  
Hindered nucleoside analogs as antiviral agents 1007  
Virtual combinatorial chemistry and in silico screening: Efficient tools for lead structure discovery? 991
- HNK-1 ANTIGENS**  
New schemes for the synthesis of glycolipid oligosaccharide chains 1705
- HOMOGENEOUS CATALYSIS**  
Application of C–H and C–C bond activation in organic synthesis 577
- HOMOGENEOUS-SUPPORTED CATALYSIS**  
Heterogeneous asymmetric catalysis 679
- HOMOLOGY MODEL**  
Search for noncompetitive 2-amino-3-(3-hydroxy-5-methyl-4-isoaxazolyl)propionic acid receptor (AMPA) antagonists: Synthesis, pharmacological properties, and computational studies 931
- HORMONES**  
Biosensors for environmental applications: Future development trends 723
- HPLC DETECTION**  
Potentiometric detection for high-performance liquid chromatography is a reality: Which classes of organic substances are the targets? 839
- HUGO**  
Properties and units in the clinical laboratory sciences. Part XVIII. Properties and units in clinical molecular biology 1799R
- HUMAN GENOME**  
Properties and units in the clinical laboratory sciences. Part XVIII. Properties and units in clinical molecular biology 1799R
- HYBRIDE RECEPTOR LIGAND**  
Neuropeptide mimetics for pain management 941
- HYDRAZINO ALCOHOL**  
Discovery of new anti-inflammatory agents 965
- HYDROACYLATION**  
Application of C–H and C–C bond activation in organic synthesis 577
- HYDROALKYLATION**  
Palladium-catalyzed alkylation of unactivated olefins 671
- HYDROAMINATION**  
Development of catalysts for the hydroamination of olefins 507
- HYDROGEN**  
Ecologically benign motor fuels and petrochemicals from alternative raw materials 1735
- HYDROGEN BONDS**  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115  
Molecular structure, reorientational dynamics, and intermolecular interactions in the neat ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate 255  
Morphology of blends of self-assembling long-chain carbamate and stearic acid 1353  
Pressure dependence of the liquid structure and the Raman noncoincidence effect of liquid methanol revisited 247
- HYDROGEN BONDING**  
Controlling the assembly of hydrogen-bonded supramolecular polymers by the strategy of molecular tectonics 1345  
Translational and rotational dynamics in supercritical methanol from molecular dynamics simulation 203
- HYDROGEN SUBSTITUTION**  
 $S_N^H$  methodology and new approaches to condensed heterocyclic systems 1621

- HYDROGENATION**  
Stoichiometric and catalytic CO<sub>2</sub> reductions involving TiFe-containing intermetallic hydrides 1769
- HYDROGENATION OF KETONES**  
Development of a new methodology for the preparation of optically active alcohols 547
- HYDROGEN-BONDED COMPLEXES**  
Directing self-assembly in macromolecular systems: Hydrogen bonding in ordered polymers 1337
- HYDROIMINOACYLATION**  
Application of C–H and C–C bond activation in organic synthesis 577
- HYDROXYMETHYLCYTOSINE**  
Chemistry for the synthesis of nucleobase-modified peptide nucleic acid 1591
- HYDROXYMETHYLURACIL**  
Chemistry for the synthesis of nucleobase-modified peptide nucleic acid 1591
- HYDROXYPROPYLCELLULOSE**  
Polymeric micelles for oral drug delivery: Why and how 1321
- IMINATION OF SULFOXIDES**  
New methods for the synthesis of heterocyclic compounds 603
- IMMISCIBLE ELECTROLYTE SOLUTIONS**  
Electrochemistry at the interface between two immiscible electrolyte solutions 2147R  
Voltammetry of drugs at the interface between two immiscible electrolyte solutions 697
- IMMUNOSENSITIZATION**  
Mechanisms of immunosensitization to metals 1255R
- IMMUNOSTIMULANTS**  
From synthetic polyelectrolytes to polymer-subunit vaccines 1659
- IN VITRO EVOLUTION**  
Ribozymes that use redox cofactors 1525
- IN VITRO SELECTION**  
Engineering DNA aptamers and DNA enzymes with fluorescence-signaling properties 1547  
Structure–function investigation of a deoxyribozyme with dual chelatase and peroxidase activities 1537
- INCLUSION COMPLEX**  
Past, present, and future of cyclodextrin research 1825
- INDIUM**  
3-Halopropenyl esters as precursors of a new class of oxygen-substituted allylic organometallic compounds: Applications in organic synthesis 657
- INDUCTION MECHANISMS**  
Vibration-rotation spectra of hydrogen halides in rare-gas liquids: Q-branch absorption 241
- INDUSTRIAL PRODUCTION OF CYCLODEXTRINS**  
Past, present, and future of cyclodextrin research 1825
- INELASTIC X-RAY SCATTERING**  
Inelastic X-ray scattering and high-frequency dynamics of molecular liquids 79
- INERTIAL TERM**  
Polar solvation dynamics: A combination of the reference interaction-site model and mode-coupling theories 71
- INFORMATION PROCESSING**  
Molecular devices 1887
- INFRARED ABSORPTION**  
Supercritical water: Local order and molecular dynamics 133
- INFRARED SPECTRA**  
Vibration-rotation spectra of hydrogen halides in rare-gas liquids: Q-branch absorption 241
- INTEGRAL EQUATION THEORY**  
Thermodynamical, structural, and dielectric properties of molecular liquids from integral equation theories and from simulations 63
- INTERFACE**  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115
- INTERMETALLIC COMPOUND**  
Stoichiometric and catalytic CO<sub>2</sub> reductions involving TiFe-containing intermetallic hydrides 1769
- INTERMOLECULAR CARBOMETALLATION**  
Recent advances in transition metal-catalyzed or -mediated cyclization of 2,3-allenoic acids: New methodologies for the synthesis of butenolides 651
- INTERMOLECULAR INTERACTION POTENTIAL**  
"Morphing" of ab initio-based interaction potentials to spectroscopic accuracy: Application to Cl<sup>−</sup>(H<sub>2</sub>O) 29
- INTERMOLECULAR INTERACTIONS**  
Molecular structure, reorientational dynamics, and intermolecular interactions in the neat ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate 255
- ION ASSOCIATION**  
Thermodynamical, structural, and dielectric properties of molecular liquids from integral equation theories and from simulations 63
- ION BEAM ANALYTICAL TECHNIQUES**  
Critical evaluation of the state of the art of the analysis of light elements in thin films demonstrated using the examples of SiO<sub>x</sub>N<sub>y</sub> and AlO<sub>x</sub>N<sub>y</sub> films 1161R
- ION PAIRS**  
Structure and criticality of ionic fluids 19
- ION SOLVATION**  
Thermodynamical, structural, and dielectric properties of molecular liquids from integral equation theories and from simulations 63
- ION TRANSPORT**  
Transport properties of diatomic ions in moderately dense gases in an electrostatic field 223
- IONIC FLUIDS**  
Structure and criticality of ionic fluids 19
- IONIC LIQUIDS**  
Molecular structure, reorientational dynamics, and intermolecular interactions in the neat ionic liquid 1-butyl-3-methylimidazolium hexafluorophosphate 255
- IONIZABLE DRUGS**  
Voltammetry of drugs at the interface between two immiscible electrolyte solutions 697
- IONS**  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115
- IONS IN ELECTRIC FIELD**  
Transport properties of diatomic ions in moderately dense gases in an electrostatic field 223
- IOPHILICITY**  
Voltammetry of drugs at the interface between two immiscible electrolyte solutions 697
- IR-GENE**  
From synthetic polyelectrolytes to polymer-subunit vaccines 1659
- ISOMERIC EQUILIBRIA**  
Acid-base properties of purine residues and the effect of metal ions: Quantification of rare nucleobase tautomers 1869  
Adenosine 5'-triphosphate (ATP4<sup>−</sup>): Aspects of the coordination chemistry of a multitargeted biological substrate 375
- ISOMERIZATION**  
Using light to control physical properties of polymers and surfaces with azobenzene chromophores 1445
- ISOTOPES**  
Are isotopic mixtures ideal? 11
- ISOTOPE EFFECTS**  
Are isotopic mixtures ideal? 11

Block copolymer vesicles 1309
- VIBRATIONAL CONFIGURATION INTERACTION  
"Morphing" of ab initio-based interaction potentials to spectroscopic accuracy: Application to Cl<sup>-</sup>(H<sub>2</sub>O) 29
- VIBRATIONAL COUPLING  
Raman noncoincidence effect: A spectroscopic manifestation of the intermolecular vibrational coupling in dipolar molecular liquids 157
- VIBRATIONAL DEPHASING  
Critical Raman line shape behavior of fluid nitrogen 147
- VIBRATIONAL DYNAMICS  
Inelastic X-ray scattering and high-frequency dynamics of molecular liquids 79
- VIBRATIONAL FREQUENCIES  
"Morphing" of ab initio-based interaction potentials to spectroscopic accuracy: Application to Cl<sup>-</sup>(H<sub>2</sub>O) 29
- VIBRATIONAL SPECTROSCOPY  
Spectroscopy of interparticle interactions in ionic and molecular liquids: Novel approaches 171
- VIBRATIONS AND ROTATIONS  
Ab initio QM/MM MD simulations of the hydrated Ca<sup>2+</sup> ion 37
- VINYLARENES  
Development of catalysts for the hydroamination of olefins 507
- VOLTAMMETRY  
Voltammetry of drugs at the interface between two immiscible electrolyte solutions 697
- WATER  
Calculation of the free energy of solvation from molecular dynamics simulations 231  
External double reference method to study concentration and temperature dependences of chemical shifts determined on a unified scale 105
- WATER CLUSTERS  
Origin of the enhanced structural and reorientational relaxation rates in the presence of relatively weak dc electric fields 215
- WATER EXCHANGE  
Ab initio QM/MM MD simulations of the hydrated Ca<sup>2+</sup> ion 37
- WATER MOLECULES  
Dynamics and metastable surface structure of double atomic layer of water molecules and ions at the interface between KBr(c) and water 115
- WATER POLLUTION  
Biosensors for environmental applications: Future development trends 723
- WOLFF REARRANGEMENT  
Pyridylketenes: Structure reactivity effects in nucleophilic and radical addition 1953
- X-RAY ABSORPTION SPECTROSCOPY  
Use of phytomimetic technologies in the removal of heavy metals: A review 801
- X-RAY ANALYTICAL TECHNIQUES  
Critical evaluation of the state of the art of the analysis of light elements in thin films demonstrated using the examples of SiO<sub>x</sub>N<sub>y</sub> and AlO<sub>x</sub>N<sub>y</sub> films 1161R
- X-RAY CRYSTALLOGRAPHY  
Structural basis for 2-amino-3-(3-hydroxy-5-methyl-4-isoxazolyl)propionic acid (AMPA) receptor activation 921

## X-RAY DIFFRACTION

Morphology of blends of self-assembling long-chain carbamate and stearic acid 1353

## X-RAY STRUCTURE

Spacer conformation in biologically active molecules 959

## YOUNG'S MODULUS

Rheological and mechanical properties of poly( $\alpha$ -methylstyrene-co-acrylonitrile)/poly(methylacrylate-co-methyl methacrylate) blends in miscible and phase-separated regimes of various morphologies. Part IV: Influence of the morphology on the mechanical properties 389R
